

METUS Launches New SUZ Universal Outdoor Unit

2019-03-21

Mitsubishi Electric Trane HVAC US (METUS) introduced the new singlezone SUZ model universal outdoor unit.

The single zone outdoor unit is part of the M-Series product line from METUS, which includes indoor unit, outdoor unit and control options for residential and light commercial applications.

The unit is unique in its ability to match with a variety of indoor units with differing sizes and designs.

Compatible indoor units and capacities include:

- SLZ-KF 2x2 ceiling cassette 3D i-see Sensor 12, and
- MLZ-KP one-way ceiling cassette in 9, 12 and 18 kBTU/h
- SEZ-KD low-static ducted unit in 9, 12, 15 and 18 kBTU/h
- PEAD mid-static ducted unit in 9, 12, 15, 18, 24, 30 and 36 kBTU/h
- SVZ multi-position air handler in 12, 18, 24, 30 and 36 kBTU/h

"The variety of indoor unit sizes and styles compatible with our new universal outdoor unit really speaks to its versatility, and represents increased opportunities for application," said Brinnon Williams, director of product planning, METUS. "The new unit rounds out the M-Series lineup and expands customer options. We anticipate frequent usage with smaller capacity indoor units in residential performance construction applications, and with larger capacity units for light commercial projects."

In addition to the expanded size offering and program updates to match more indoor units, the SUZ universal outdoor unit also provides value to distributors since it can reduce the amount of product they have to inventory.
